

# ALUMINUM WORKBOATS

## COASTAL MODELS

AFTI and Ro-Clean Desmi have been building and supplying spill response workboats for over 25 years.

In addition to the POLLCAT, POLLCRAFT and POLLKITTEN dynamic oil skimming vessels we now offer a comprehensive range of lightweight aluminum response craft capable of a variety of duties in support of pollution operations.

The **COASTAL** line are multi-purpose, no nonsense vessels and offer fully welded marine aluminum hulls. Perfect in shallow water and near shore operations, these vessels have standard 2.75m - (9') retractable bow loading ramps and are the ultimate mini-barge for transporting cargo, equipment and gear to shoreline spill sites. The aluminum non-skid self-bailing floor is perfect for response operations. The 5mm (3/16") hull material ensures years of superior service and durability.

| Model      | Length | Beam | Weight   | Seating | Outside freeboard | Deadrise | Max HP |
|------------|--------|------|----------|---------|-------------------|----------|--------|
| Coastal 18 | 18'    | 80"  | 1200 lbs | 4 to 5  | 26"               | 7°       | 70     |
| Coastal 20 | 20'    | 80"  | 1400 lbs | 4 to 5  | 28"               | 7°       | 90     |
