

ALUMINUM WORKBOATS

INTENSITY MODELS

AFTI and Ro-Clean Desmi have been building and supplying spill response workboats for over 25 years.

In addition to the POLLCAT, POLLCRAFT and POLLKITTEN dynamic oil skimming vessels we now offer a comprehensive range of lightweight aluminum response craft capable of a variety of duties in support of pollution operations.

The **INTENSITY** line is the perfect working platform for all types of spill response operations. The large, self-bailing aluminum non-skid floor is perfect for boom laying or skimming operations. The **INTENSITY** line boasts a planing, V haul for both speed and easy maneuverability without jeopardizing cargo carrying capabilities. Available in sizes up to and beyond 12 m, this low maintenance, stable and strong commercial craft will provide the most economical and cost effective choice for spill operations. Several options are available, tow posts, partial and full cabins, and with a full range of propulsion options. These vessels have standard extra wide drop bow gates.

Model	Length	Beam	Cargo Capacity	Sides	Bow Gate
Intensity 24	24'	9'-10"	3000 lbs	3'-0"	72"
Intensity 26	26'	9'-10"	3800 lbs	3'-0"	72"
Intensity 28	28'	9'-10"	4400 lbs	3'-0"	72"
Intensity 28 WB	28'	11'-0"	5000 lbs	4'-0"	85"
Intensity 30	30'	11'-11"	8000 lbs	4'-0"	102"
Intensity 32	32'	11'-11"	9000 lbs	4'-0"	102"
Intensity 34	34'	11'-11"	10000 lbs	4'-0"	102"
Intensity 36	36'	11'-11"	11000 lbs	4'-0"	102"
Intensity 42	42'	11'-11"	22000 lbs	5'-0"	102"
